How to Set Password Policy in SATATYA NVR/HVR?

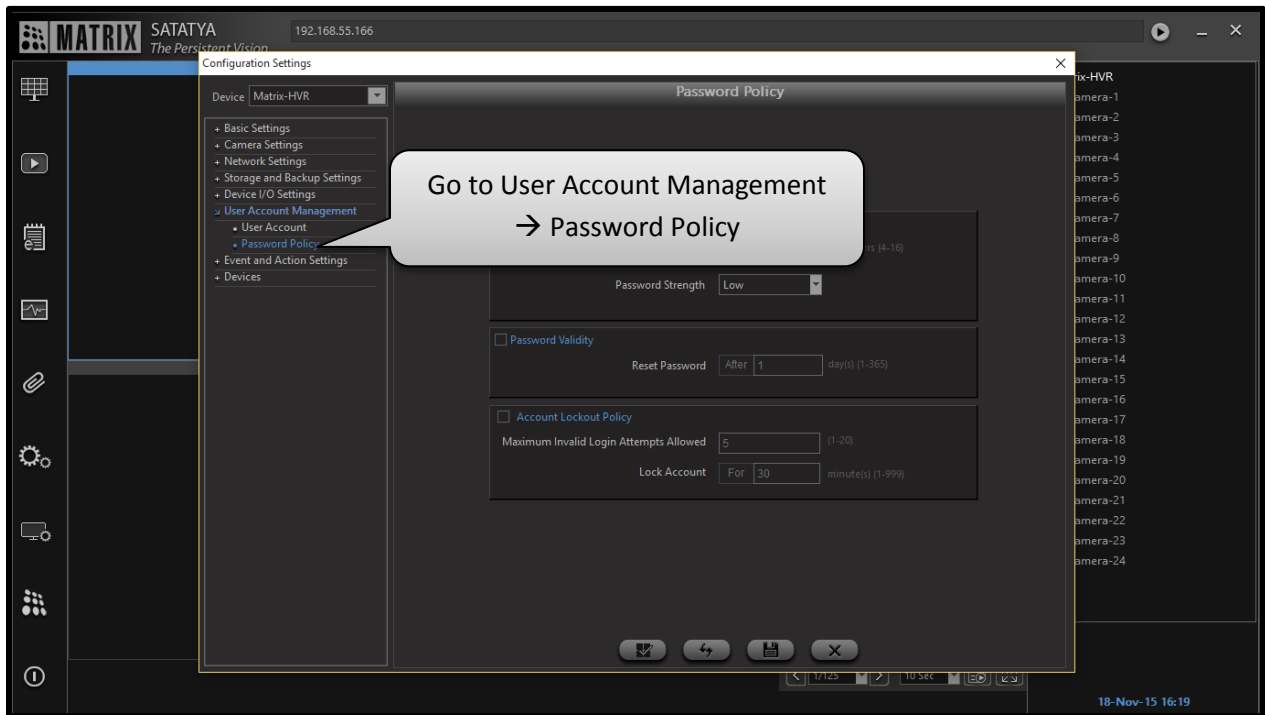

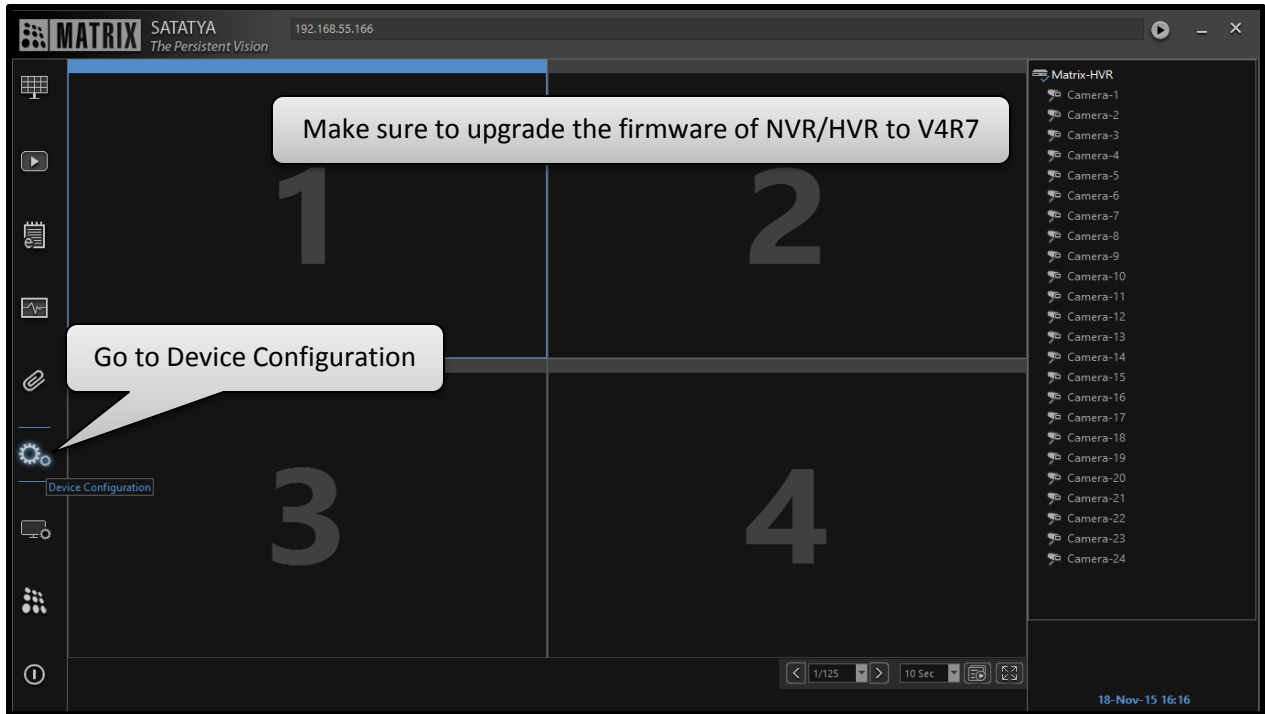

If the password is to be changed, you can set the password strength as either low, medium or high

It's a good practice to change password from time to time. You can now set the password reset interval.

If a user exceeds the number of login attempts allowed, you can lock him for a certain period of time.

Password Strength

Minimum Password Length characters (4-16)

Password Strength

Password Validity

Reset Password

Account Lockout Policy

Maximum Invalid Login Attempts Allowed (1-20)

Lock Account For minute(s) (1-999)

Enter how long the password should be (minimum 4 characters and maximum 16 characters)

Password Strength

Minimum Password Length characters (4-16)

Password Strength

Password Validity

Reset Password

Account Lockout Policy

Maximum Invalid Login Attempts Allowed (1-20)

Lock Account For minute(s) (1-999)

- Select the strength of the password:
- Low (should contain at least 4 characters)
 - Medium (should contain at least one uppercase, one lowercase and one number)
 - High (should contain at least one Uppercase, one lowercase, one number and a special character out of `_.()[]:@!#$*+/\`)

Password Strength

Minimum Password Length characters (4-16)

Password Strength

Password Validity

Reset Password After day(s) (1-365)

Account Lockout Policy

Maximum Invalid Login Attempts Allowed (1-20)

Lock Account For minute(s) (1-999)
